

November 4, 2011

Dear Dr. Mehta:

On the occasion of the inauguration of the new premises of the *Pain Care Clinic* in Ahmedabad, India on the 6th of November 2011, it is my privilege and honor to extend on behalf of the World Institute of Pain our ultimate encouragement on this momentous occasion.

There is a famous saying attributed to the late Spanish artist Pablo Picasso, *La acción es la llave fundamental a todo el éxito*, which means, “Action is the foundational key to all success.”

The WIP Indian Section is truly an active leader in our global society of pain physicians who have embraced both professionally and personally the standards of excellence in interventional pain practice that guide all of us towards success. May your new and modern facilities inspire others throughout India and beyond to reach for success by embracing the essence of our global mission of excellence in pain education, training, and clinical practice.

Warmest blessings,

Ricardo Ruiz-López, MD, FIPP
President- World Institute of Pain (USA)
